

New Glow Medspa - Microneedling Informed Consent

I hereby authorize New Glow Medspa Practitioner to perform Microneedling Therapy (Collagen Induction Therapy). I understand that this procedure is purely elective.

I understand the following contraindications listed below and will notify my provider if any of the following apply to me:

- Active infections - viral, fungal, bacterial
- Rashes, warts, skin cancer
- Active acne
- Immune-suppressed patients
- Skin-related autoimmune disorders
- Pregnant or breast-feeding
- Patients on anticoagulants (NSAIDS, ASA, Coumadin/Warfarin)
- Recent ablative dermal procedures
- Rosacea
- Diabetes
- Actinic (solar) keratosis
- Keloids

What to Expect:

- Depending on the area of your face or body being treated and the type of device used (i.e. needle length), the procedure is well-tolerated and, in some cases, virtually painless, feeling only a mild prickling sensation.
- Your practitioner will apply a topical anesthetic to your skin prior to treatment to reduce any pain and discomfort.
- Your skin will be pink or red in appearance, much like a sunburn, for a couple of hours following treatment.
- Minor bleeding and bruising are possible depending on the length of the needle used and the number of times it is pressed across the treatment area.
- Your skin may feel warm, tight, and itchy for a short while. This should subside in 12-48 hours.

Possible Side-Effects:

- Side effects or risks are minimal with this type of treatment and typically include minor flaking or dryness of the skin with scab formation in rare cases.
- Milia (small white bumps) may form; these can be removed by the practitioner.
- Hyper-pigmentation (darkening of certain areas of the skin) can occur very rarely and usually resolves after a month.
- If you have a history of cold sores, this procedure may cause flare ups.
- Temporary redness and mild-sunburn effects may last up to 4 days.
- Freckles may temporarily lighten or permanently disappear in treated areas.
- Other potential risks include: crusting, itching, discomfort, bruising, infection, swelling, and failure to achieve the desired result. Permanent scarring (less than 1%) is extremely rare.

Release for treatment: The benefits and risks of the procedure have been explained to me, and I accept these benefits and risks. The nature of my medical or cosmetic condition has been explained to my satisfaction as have been any substantial or significant risks of harm. I am also aware of and accept the risk of rare and unforeseen complications which may not have been discussed and which may result from this treatment. I have had the opportunity to ask questions and seek clarification of this procedure and its alternatives including no treatment and my questions have been answered satisfactorily.

I certify that I have read this entire informed consent and that I understand and agree to the information provided in this form. I understand that withholding information may result in contraindication and/or irritation to the skin from treatment received. The Treatments I receive here are voluntary, and I release institution New Glow Medspa LLC and professional technician Maria Mathern from liability and assume full responsibility thereof. I agree that this consent supersedes any previous verbal or written disclosures. This consent is valid for all of my microneedling treatments in the future as well.
