

New Glow Medspa NeoSkin Laser Rejuvenation – Pre and Post Treatment Care

Pre-Treatment:

- Notify your practitioner of any medications you have used within the last 6 months.
- Discontinue use of skin care products containing AHA's, retinoids, exfoliants, etc 1 week prior to treatment.
- Notify your practitioner if you have a history of perioral herpes
- Shave or trim any hair in the area to be treated. This will help achieve the best possible results.

Post-Treatment:

- You may return to your normal daily activities immediately after your treatments.
- Avoid extended sun exposure or tanning for at least 1-week post treatment.
- Any redness that occurs, if any, should disappear within a few hours after the treatment, and if you would like, apply an ice pack.
- Use of a broad-spectrum UVA/UVB SPF 30 is very important after receiving any laser treatment. Remember to reapply throughout the day.
- To achieve the best results, complete the full treatment schedule at the intervals recommended by your laser practitioner.
